

**WE OPTIMISE YOUR  
PRODUCTION PROCESSES**

**More than just spare parts!**

Partner, process optimiser and problem solver  
**for recycling shredders and crushers.**

## YOUR COMPETENT AND RELIABLE PARTNER

The CUTMETALL company group is one of the leading manufacturers and distributors of industrial knives, spare and wear parts, as well as complete machine assemblies for the recycling and shredding industry.

As a full-range supplier with the highest market coverage, CUTMETALL develops process-optimised industrial knives, as well as other spare parts, wear parts and complete systems for the machines of over 30 manufacturers.

In doing so, our experts concentrate on creating products that are optimally matched to the individual machine types and areas of application.

Since 1996, we have been a competent and reliable partner when it comes to optimising the quality and safety of shredding processes:

**Through high-quality products, customer-oriented services and well-founded consulting.**

Our spare and wear parts are not original parts of the machine manufacturers, but process-optimised CUTMETALL own brands:

**Precisely fitting.**

**Durable.**

**Economical.**

Cutting crowns

## CUTMETALL INNOVATIONS

In addition to standard spare parts, our comprehensive range already encompasses a variety of specially optimized spare parts for different shredder models.

We are eager to assist you in identifying the optimal product for your application. Furthermore, we are prepared to develop the appropriate spare part tailored to your specific needs – whether it be a knife, screen, clamping bar, stator cassette, or, for instance, a cutting crown. We are available to offer guidance on whether and how the service life and durability of your machines can be prolonged through adapted spare parts.

## SUSTAINABLE AND ECONOMICAL

We provide our customers with individual solutions for their specific applications, enabling them to optimize their entire recycling process and thus operate more efficiently from an economic standpoint. We assert that our customers experience longer service lives, reduced downtime, and significant time savings due to the superior quality of CUTMETALL products.

In doing so, we focus on the entire recycling process and, in cooperation with our customers, strive to respond to prevailing conditions, special requirements, and needs, delivering coordinated solutions and concepts.

## YOUR ADVANTAGES

Our design department creates customised solutions for individual requirements together with our product developers.

We optimise our customers shredding and cutting processes and reduce the downtime of their machines.

### **Our non-binding / free of charge service includes:**

- On-site visits
- Measurement of sample parts
- Material and hardness testing
- Break analyses
- Advice on materials - suitable for your application

With several thousand spare and wear parts, CUTMETALL is one of the leading suppliers of shredding accessories. The extensive range includes shredder parts for numerous common shredder and granulator models from over 50 manufacturer brands.

**CUTMETALL - partner, process optimiser and problem solver for the recycling and shredding industry.**
